

BACKGROUND

Technology Concepts & Design, Inc. (TCDI) was founded in 1988 to provide business and government clients with advanced application and system design services. Today, the company is recognized as a leader in the litigation software and services market, serving many Fortune 500 companies and AmLaw 200 law firms who operate in some of the most complex legal environments in the world.

Over the course of TCDI's 20+ year history clients have played, and continue to play, an active role in the development of proprietary software systems. This cooperative approach has resulted in sophisticated levels of automation along with flexible and highly customizable applications like Discovery WorkFlow, ClarVergence for eDiscovery, and ClarVergence for Case Management.

Experience and "client driven technology" are only part of what makes TCDI so unique. Our highly experienced project management teams, 24x7 support staff and commitment to building long-term partnership is what truly sets us apart. This track record of exceeding client expectations has earned TCDI an unprecedented level of client loyalty in a competitive and oversaturated market.

POWERING USERS THROUGH COMPLEX LITIGATION

THE TCDI APPROACH

Security: Many of TCDI's clients are involved in complex and highly sensitive litigation involving millions of documents and sometimes terabytes of data. Therefore, TCDI's technical infrastructure and Tier-3 Data Center are designed accordingly offering high levels of data security without compromising on system speed, performance or scalability.

Flexibility: Technology is advancing at a breakneck pace and companies should have the freedom to take advantage of industry improvements if and when they choose. Unlike other providers who are tied to embedded technologies, TCDI's solutions are modular with integration points that enable a uniquely adaptable approach. This flexibility gives clients the freedom to incorporate those technologies which are best suited for their unique processes as well as to the project at hand.

Responsiveness: One of TCDI's first major litigation support clients remains a key client today - more than 14 years after the relationship began. This longevity is typical at TCDI and is a direct result of our commitment to coupling superior, client driven technology with the highest levels of responsiveness and client satisfaction.
