

## Welcome to the Human Side of Tech

### Digital Forensics

In today's digitized world, evidence is rarely preserved on paper. The good news is that electronic data, which can be from any digital asset or data storing entity, often leaves a deeper trail than paper.

Because so many business records and other types of information that may become evidence are stored digitally, the foundation of every case is the proper collection of electronically stored information (ESI). At TCDI, we know precisely how to discover and collect digital evidence.

Our dedicated team of experts brings a hands-on approach to our state-of-the-art forensic technology and methodologies, to collect evidence in a defensible manner, to provide you with an unwavering feeling of certainty and safety.

### Collection Capabilities

TCDI's collection capabilities encompass the full range of data, including desktop computers, servers, databases and other devices such as flash drives, phones, websites, network shares, and cloud based platforms. TCDI can also conduct searches of computing systems across a network by file name, keywords, deleted files, date, path, security permissions, file system type, file signature, and many other metadata fields. We will make sure that your evidence is preserved and documented following all relevant federal guidelines, so your digital evidence will be admissible in a court of law.

### Forensic Services:

- Onsite Data Preservation / Imaging
- Cell Phone Acquisition & Analysis
- Computer Usage Reconstruction
- Internet History Analysis
- Social Media Discovery
- Deleted Data Analysis
- Data Recovery
- Expert Witness Testimony

### Our Team

Our team takes a collaborative approach and is dedicated to working closely with clients to identify their specific needs and deliver customized results. TCDI has the optimal blend of technical and legal professionals who have handled hundreds of matters involving electronically stored information and are responsive to even the most urgent requests.

Our industry leading certifications such as EnCase Certified Examiner (EnCE), Access Data Certified Examiner, and GIAC Certified Examiner reflect our dedication to providing high quality service. In addition, we are adept at providing expert testimony to verify authenticity.
